INTRODUCTION

The programme will equip students with advanced and professional knowledge through coursework and hands-on-training to expose them to the latest development in the field of environment.

PROGRAMME DESCRIPTION

Exploring Malaysia's tropical rainforest.

Expose students to the importance of environment for society and the world. Students will learn environmental management and sciences skills and apply them in the field, as well as develop their knowledge and understanding about the forest ecosystem.

BENEFITS & OUTCOMES

The development of key lifetime skills and attributes such as confidence, cooperation, communication, new skills and decision-making.

Have fun exploring connection among nature, the biodiversity, ecosystem services, the outdoors and learning about Malaysia flora and fauna through a variety of activities.
